NOTICE OF WORK

September 15, 2025

In an effort to provide continued reliable sewer service to our customers, a contractor working for the City will be making necessary repairs to the sanitary sewer system in multiple areas across the City over the next 9 months. A general map of these areas is attached. Some of the sewers in need of repair are located in easements along side yards and back yards that will require access and temporary land disturbance. Any land disturbance during construction will be repaired after the project is completed.

We will do our best to minimize inconveniences related to this work, please pardon our progress. Please refer to the City's website for updates to this timeline at <https://pelhamalabama.gov/1151/City-Projects> and click on "Interactive Dashboard" to see the status of current City projects.
